INSURIUM™

Modern Insurance Software to Accelerate Your Operations & Grow Your Premiums

Insurium is a leading core platform for modern insurers. We support digital transformation and emerging technologies, enabling you to be more efficient and focus on what is most important in your business.

Digital Transformation for Modern Insurers

Insurium provides what our customers have asked for: Fast and accurate policy creation, expedited claims processing, and a digital experience to pay bills and access policy information.

Insurance Solutions to Collaborate from Anywhere

Insurium is rooted in both technology and insurance expertise, delivering innovative insurance software solutions. We enable providers to deliver more value to their customers while significantly reducing the administrative burden. Our core platform allows companies to collaborate from anywhere using powerful, web-based tools that streamline tasks, and optimize workflows. With access to essential insurance technology, we make doing business with your company easy for agents and customers.

One Cloud-Based Solution

Insurium was designed for carriers, municipal risk pools, captives, and self-insured groups interested in delivering 100% web-based tools for a 360-degree view of their customer life cycle while eliminating the need for multiple systems and processes.

Policy and Underwriting Administration

Powerful rules-based underwriting module to accommodate multistate, multi-line policy administration, so that policies get written quickly, accurately and in compliance with your organizations underwriting guidelines.

Claims Management

Completely replace your manual claims processes or existing claims management system to seamlessly integrate with policy information, close claims quickly and reduce loss expenses.

Reporting and Analytics

Immediate access to every critical aspect of the risk pool or the policy holders you manage, providing significant improvements to your ability to access critical data and the speed in which you can report and make decisions.

Security

Developed with a Microsoft-based back end and fully responsive Modern Web App Front End to support a wide array of browsers, tablets, phones, and other devices. Access information from anywhere on any device with confidence that your customer's data is secure.

Policy Holder and Producer Access

Provide self-service access to new quote submissions, policy information, claims intake and review, online bill pay for a compelling user experience and real-time access to quotes, policy, claims and payment data.

Billing and Receivables

Eliminate the need for manual invoicing and payments and integrate with your existing accounting system, making it easier for policy holders to pay - reducing your cancellations and increasing renewals.

Cloud-Based Platform

Securely delivered anywhere an internet connection can be found - no downloads or applets required, enabling increased collaboration across your organization and eliminating costly technical support and capital expenses.
